

CHS GT Research Parent/Student Information Night

Thursday, December 15th at 6:30pm via GoogleMeet

Centennial High School Gifted & Talented Program Student & Parent Information Night on **Thursday, December 15, 2022 from 6:30 - 7:30pm** via GoogleMeet (see meeting info below). Please [register to attend here](#). At this meeting, we will discuss the 2023-24 GT Intern/Mentor and GT independent Research classes.

- Students must register for classes, but they also have to **submit an application** for the class they are interested in taking next year. If your child is interested in applying to either class, they should start the application process soon; there are multiple steps, and **the class is selective**.
- Applications for both classes are available in room 901, on the CHS website, and by clicking the link:
 - [Independent Research Application](#)
 - [Intern/Mentor Application](#)
- Is your child looking for a class that will help them stand out from the crowd?
- Our GT Research graduates have attended some elite colleges in recent years: Harvard, Princeton, Yale, MIT, RIT, Univ. of Penn., Duke, JHU, UMCP Honors Program, Stanford, UVA, USAF Academy, Northwestern U., Michigan, Wake Forest, and Tufts U., just to name a few. Would your child be interested in that type of college?
- Would your child be interested in an Intern/Mentor class, where they would have the opportunity to engage in college-level research, writing, networking, and presenting skills? Kids come back to tell us how much taking this class helped them in college!
- Would it be helpful to your child to have a portfolio of original research and a recommendation from a professional to show to college admissions officers?
- Would an Independent Research class where scholarly research is conducted in conjunction with an adviser in that field benefit your student?
- Would it benefit your child to have a class where they choose their area of study so they can go beyond what a typical class or even an AP class can offer?
- Does an Intern/Mentor class where your student would work on-site with a professional in their chosen field of study sound like something that would benefit your student?

If you answered “Yes!” to any of these questions, please attend the G/T Information Night via GoogleMeet (see below for meeting info.) on **Thursday, December 15th from 6:30 - 7:30pm** to learn more about the G/T Advanced Research Program at CHS.

Thursday, December 15 · 6:30 – 7:30pm
